Professional Profile

Senior UX Designer with over **7 years** of experience leading end-to-end projects for complex B2B environments. Skilled in **usability testing**, **content design**, and **accessibility**, with deep domain experience in **e-commerce**, **payroll and HR**, **life sciences**, and **automation**. Adept at designing clear, inclusive interfaces for **web**, **desktop**, **mobile**, and touch control panels that reduce operational friction and streamline daily user workflows.

Experience

ADP, Inc. | Senior UX Designer

Sep 2025 - Oct 2026

Global Fortune 500 leader in enterprise HR and payroll software with 60,000+ employees serving 1M+ clients worldwide.

- Designed an internal operations platform **from ground-up** that combined real-time tracking data across multiple departments into a single source of truth, **eliminating days of manual alignment** and communication.
- Led UX design for **setup and monitoring** workflows between major HR platforms and global payroll engines, creating clear interfaces for both non-technical practitioners and integration specialists.
- Modernized core payroll workflows by designing features that **detect data mismatches early**, preventing costly processing errors before payout.
- Led discovery workshops, user interviews, and journey mapping; created interactive prototypes using Figma and AI tools to validate designs in moderated usability tests.
- Produced detailed interaction specifications, and reusable design system components to maintain scalable UI consistency across global development teams.

EPAM Systems | Senior UX Designer

Feb 2021 - Sep 2025

Global product design and engineering consultancy with 50,000+ employees serving enterprise clients in life sciences, and automation.

- In 3 months, delivered 2 **AI-based** concept prototypes for an XML editor and search engine during dual **discovery** phases.
- Improved UX for a web chemical editor and **led a design team** for a volunteer-based missing person search organization.
- Within 6 months, developed a tested and refined app **prototype** for controlling a mass spectrometer and analyzing results.
- In 9 months, created a bio-engineering web app with an **85/100 usability score** based on moderated tests from **40+ users**.
- In 4 months, gathered requirements via **wireframes** iterations for a web app and genome research machine interface.
- In 5 weeks, produced a UI **prototype** for an automated gem-testing machine, emphasizing negative scenarios and **inclusive design** in collaboration with industrial designers.

Freelance (Self employed) | UX Designer Feb 2020 - Feb 2021

Independent design practice delivering end-to-end web products while recruiting and leading developer teams.

- Designed **2 turnkey websites**. Ideated, validated with users and clients, and handed off mockups.
- **Managed projects** at all stages. Built teams of designers and developers. Managed client relations, and product delivery.

Betronic Software | Product Designer Feb 2019 - Feb 2020

Software studio building high-traffic online entertainment platforms with a 20+ multi-role team.

- Designed UI of websites and mobile apps with a multifunctional team for betting companies.
- Designed advertisements for social media.
